**REPORT REVIEW - ITT AEROSPACE CONTROLS, 1200 S. FLOWER STREET,
BURBANK (FILE NO. 109.0582)**

Reference is made to your consultant's letter dated February 2, 1998, transmitting the "1997 Annual Sampling and Analysis Report" for the above-referenced site. Quarterly ground water sampling has been performed since January 1991 using selected monitoring wells on the subject site. The subject submission also proposes that after completion of the first quarter 1998 sampling, all wells should be converted to an annual sampling schedule.

We have reviewed the submittal and you are authorized to proceed with the annual ground water sampling schedule after completion of the first quarter 1998 as proposed for all ground water monitoring wells. Monitoring wells may be gauged on a quarterly basis and ground water samples collected during the third quarter of 1998 as proposed. Two copies of the 1998 annual sampling and analysis report is due by **January 30, 1999**.

Please notify Board Staff at least 72 hours in advance before commencement of field work so that staff have the opportunity to be present during field work.

Your cooperation in completing the required work at this facility is appreciated. If you have any questions, please contact Walter Salas at (213) 266-7542.
